

Editor's Comment:

Interesting this approach!!

I think that in introduction or in Conclusions (at plural) some appreciations regarding the entire HORECA industry today and its status.

Of course, the statistical apparatus is welcome in the approach for pointing out the ideas.

References are wrongly written. The list is in the alphabetical order of the authors' last names.

Thus, the first one is Bodvarsson and Gibson (1994)...., Crusco and Wetzel (1984)...., and the last position is Were et al (2021)..

The year of publishing is mandatory after the author (s) name (s), positions 11, 12.

Also, where as source is an Internet site, after the respective link, to be written retrieved and the data of reading it. (e.g retrieved December 20, 2024).

Ok for publishing.
