

[Review Form 2](#)

Book Name:	Contemporary Research and Perspectives in Biological Science
Manuscript Number:	Ms_BPR_3436
Title of the Manuscript:	Hepatoprotective Effect of Annona Squamosa Linn. (AS) Leaves on Isoniazid & Rifampin Induced Hepatotoxicity in Rats
Type of the Article	Book chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is an important topic especially for hepatologists, respiratory doctors and patients suffering from tuberculosis. Follow up of tuberculosis patients or any patients taking antibiotics on liver function tests at regular intervals to prevent liver complications especially hepatotoxicity.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the article is somewhat appropriate.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The article summary is comprehensive but needs a simple introduction of one or two sentences should be written about the topic and then the goal.	
Are subsections and structure of the manuscript appropriate?	Subsections and structure of the manuscript are appropriate.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is distinguished by its scientific strength and technical accuracy, as it relies on international standards for writing manuscripts, in addition to referring to the correct scientific references in this field. It also serves a wide segment of patients, especially patients who suffer from complications resulting from taking antibiotics for tuberculosis patients, and also to maintain their liver functions.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The number of references is sufficient, as the manuscript contains 25 different and diverse references in terms of years and scientific value, including old (1972) and recent (2019). It is better to search and review more recent references, as we are in the year 2024.	
Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	The English quality of the article is suitable for scholarly communications	
Optional/General comments	Edit the manuscript according to the attached comments.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
