

[Review Form 2](#)

Book Name:	Achievements and Challenges of Medicine and Medical Science
Manuscript Number:	Ms_BPR_3622
Title of the Manuscript:	Acetabular Retrograde Drilling: A New Arthroscopic Technique for Treatment of Chondral Lesions Grade 1 and 2 in Patients with Femoroacetabular Impingement
Type of the Article	Book chapter

PART 1: Review Comments

<u>Compulsory</u> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The Acetabular Retrograde Drilling addresses an important diagnostic challenge in MSK. By leveraging Arthroscopic Technique for Treatment of Chondral Lesions in Patients with Femoroacetabular Impingement the authors provide valuable insights into its potential newer way to treat this lesion, contributing meaningfully to minimally invasive treatment.	
Is the title of the article suitable? (If not please suggest an alternative title)	yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Well structured abstract	
Are subsections and structure of the manuscript appropriate?	Yes, kindly improvise the keywords	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The discussion aligns the study's findings with existing literature but lacks a critical analysis of conflicting studies, especially regarding authors experience in applying this technique. Author should also explain briefly about clinical and MRI imaging features of Chondral Lesions in Patients with Femoroacetabular Impingement.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Kindly cite recent studies mentioning the clinical use of this procedure and its outcomes	
<u>Minor</u> REVISION comments Is the language/English quality of the article suitable for scholarly communications?	yes	
<u>Optional/General</u> comments	Other treatment procedures to treat Femoroacetabular Impingement should also be discussed in brief	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
