Book Name:	<a href="#">Current Research Progress in Agricultural Sciences</a>
Manuscript Number:	Ms_BPR_3735
Title of the Manuscript:	Antifungal effect of extracts of plant leaves on postharvest decay and quality of tomato fruits during storage
Type of the Article	Book Chapter

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript contains the antifungal properties of plant leaf extracts, which are environmentally friendly, cost-effective, and safe for consumers. These botanicals help reduce postharvest decay and preserve tomato quality during storage. These botanicals offer a practical way to minimize deterioration at ambient temperatures, supporting sustainable agriculture and advancing plant-based biopesticides for future disease management.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, the abstract of the article is comprehensive.	
Are subsections and structure of the manuscript appropriate?	Yes, its is.	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	The study evaluates the antifungal effects of plant leaf extracts on postharvest quality and decay of tomatoes in Makurdi, showing significant reductions in decay and weight loss in treated fruits. While the findings highlight the potential of plant extracts in extending shelf life and promoting sustainable disease management, specifying storage conditions and providing statistical evidence would enhance clarity and applicability.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes.	
<b>Minor</b> REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	Yes, it is.	
<b>Optional/General</b> comments
