

[Review Form 2](#)

Book Name:	Scientific Research, New Technologies and Applications
Manuscript Number:	Ms_BPR_3737
Title of the Manuscript:	The Impact of COVID-19 on Nigeria Consumer Price Index (CPI)
Type of the Article	Book chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	This manuscript is significant for the scientific community as it addresses the critical issue of modeling the Consumer Price Index (CPI) in Nigeria during the COVID-19 pandemic. By evaluating multiple econometric models, the study provides valuable insights into the most effective tools for understanding inflation dynamics in developing economies. Its findings have practical implications for policymakers aiming to stabilize inflation and improve economic resilience during crises	
Is the title of the article suitable? (If not please suggest an alternative title)	The current title, "The Impact of COVID-19 on Nigeria Consumer Price Index (CPI)," is clear but could be made more specific to highlight the methodological focus and findings. Consider an alternative title such as: "Modeling and Forecasting Consumer Price Index (CPI) in Nigeria During COVID-19 Pandemic: A Comparative Analysis of Econometric Models" This revised title emphasizes both the context (COVID-19) and the core contribution (model comparison and forecasting).	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is somewhat comprehensive but the following could be included to improve: <ul style="list-style-type: none"> • Add the data source and timeframe. • Summarize the key findings with explicit reference to model performance (e.g., "AR was identified as the best model for overall fit, while GARCH-N excelled in dynamic forecasting."). • Conclude with a stronger statement on how the findings can influence economic policy and decision-making during crises. 	
Are subsections and structure of the manuscript appropriate?	Create a distinct section for "Policy Implications" to emphasize the practical contribution of the study	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	This manuscript is scientifically robust and technically sound due to its comprehensive use of established econometric models to evaluate the Consumer Price Index (CPI) in Nigeria. Additionally, the findings are well supported by metrics like information criteria, and forecast accuracy measures, lending credibility to the results	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Include more recent studies on the impact of COVID-19 on inflation or CPI in emerging markets to align with the context of the manuscript	
Minor REVISION comments	Language quality is generally suitable for scholarly communication	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	The manuscript addresses a relevant topic by analyzing the impact of COVID-19 on CPI using econometric models in Nigeria. This aligns with current global interests in understanding pandemic-induced economic disruptions, particularly in developing economies.
