Book Name:	Achievements and Challenges of Medicine and Medical Science
Manuscript Number:	Ms_BPR_3864
Title of the Manuscript:	Determining the levels of cytokines in metabolic syndrome and non-metabolic syndrome individuals
Type of the Article	Book chapter

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Cytokines are important diagnostic markers of inflammation. Both metabolic syndrome and inflammation are common risk factors for various complications. Metabolic syndrome is characterized by abnormalities in blood pressure, blood sugar, waist circumference, and cholesterol or triglyceride levels. The study's findings mentioned in this chapter unequivocally demonstrate that both pro-inflammatory and anti-inflammatory cytokines contribute to the development of secondary illnesses associated with metabolic syndrome.	
Is the title of the article suitable? (If not please suggest an alternative title)	OK	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Is the manuscript scientifically correct? Please write here.	Yes	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes, only conclusion section needs to be elaborated.	
Is the language/English quality of the article suitable for scholarly communications?	Yes, scientifically, it's ok.	
<u>Optional/General</u> comments	At least, two references of last 2 years should be included.
