Optional/General comments	This article is well-written. I have some editing suggestions; - I suggest that the English grammar of the text be reviewed - It does not seem appropriate to give five references to the same sentence in the introduction, you can reduce this - In the discussion section, you can point out that there are also cytokine increases in metabolic syndrome-related dermatological diseases; "Ataseven, A., et al. (2022). Comparison of anti-TNF and IL-inhibitors treatments in patients with psoriasis in terms of response to routine laboratory parameter dynamics. Journal of Dermatological Treatment, 33(2), 1091-1096."
