

[Review Form 3](#)

Book Name:	Current Research Progress in Agricultural Sciences
Manuscript Number:	Ms_BPR_3917
Title of the Manuscript:	Organic Farming: Principles, Practices and Prospects
Type of the Article	Book chapter

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript is highly relevant to the scientific community as it offers a thorough exploration of organic farming, focusing on its principles, practices, and future prospects. It discusses the various benefits of organic agriculture, including environmental sustainability, biodiversity conservation, and climate resilience, thereby enhancing our understanding of sustainable farming. Additionally, the manuscript addresses existing challenges and proposes potential solutions, setting the stage for future research and innovations in organic farming practices. The inclusion of case studies from different regions adds to its practical relevance, providing valuable insights for policymakers, researchers, and practitioners around the world.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is very basic we can modify the title to this "Organic Farming: Strategies for a Resilient and Sustainable Future"	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract effectively summarizes the principles, practices, benefits, and challenges of organic farming while highlighting its role in sustainability and climate resilience. To improve clarity, consider briefly mentioning key case studies or specific examples that illustrate successful organic farming practices worldwide. Additionally, you could emphasize how the manuscript contributes to advancing research and practical applications in organic farming. If space permits, it would be beneficial to highlight the significance of the discussed innovations or technologies for scalability. Removing overall general statements can help make the abstract more concise and impactful..	
Is the manuscript scientifically, correct? Please write here.	Yes, the manuscript appears to be scientifically correct, as it is well-supported by evidence and references relevant to the principles, practices, and challenges of organic farming.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	The references in the manuscript are sufficient and include a mix of recent and relevant sources, particularly from 2023 and 2024. However, to further enrich the manuscript, consider including references focusing on cutting-edge technologies in organic farming, such as AI-based tools, advanced biopesticides, or region-specific studies on organic farming in developing countries. Studies from leading journals like <i>Agriculture, Ecosystems & Environment</i> or <i>Frontiers in Sustainable Food Systems</i> could provide additional depth.	

[Review Form 3](#)

Is the language/English quality of the article suitable for scholarly communications?	Yes, the language and English quality of the article are suitable for scholarly communication, with clear and formal expression of ideas.	
Optional/General comments	The manuscript provides a detailed exploration of organic farming, covering its principles, practices, benefits, and challenges effectively. The inclusion of global case studies adds to its relevance. To enhance its impact, consider emphasizing recent innovations, such as precision agriculture tools and advanced organic inputs. Adding a stronger focus on region-specific challenges, particularly in developing countries, could broaden its applicability. Overall, the manuscript is well-structured and contributes significantly to the understanding of sustainable agriculture, offering valuable insights for researchers, policymakers, and practitioners.	

PART 2:

	<u>Reviewer's comment</u>	<u>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</u>
<u>Are there ethical issues in this manuscript?</u>	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
