Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This chapter is important to all UG / PG medical students and paramedical students too. This chapter briefly described about the origin, course and the clinical importance in each part of intracranial facial nerve. The author has mentioned about the every thing about the facial nerve.	
Is the title of the article suitable? (If not please suggest an alternative title)	'Intracranial part of facial nerve: Anatomy and its clinical implications' (As this will be a book chapter i would suggest not to give title as 'STUDY OF')	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	comprehensive	
Is the manuscript scientifically, correct? Please write here.	YES	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Number of references is good. I don't have access to most of the references mentioned by the author. I would like to suggest to have more reviews / suggestion from others.	
Is the language/English quality of the article suitable for scholarly communications?	YES	
Optional/General comments	<ol style="list-style-type: none"> 1. COLOURED IMAGES 2. TABLES 3. Author has not mentioned source of the images he/she uploaded. 4. Since it is a book chapter, the publisher has not given me information about the readers to whom this book is mainly publishing. Like this may be for MBBS UG or ANATOMY PG or Dental students or entrance exams or for para medical / nursing students. I don't know who are the audience here for this book. Depending on the audience the explanation, presentation and description changes.
