

Editor's Comment:

I accept the manuscript for publication in the BP International.

Considering the reviewers comments and authors corrections, we can publish this manuscript. The reasons are as follows:

- 1- One reviewer gives comments such as "This manuscript is significant for the scientific community as it advances the understanding of AgGaSe_2 thin films synthesized via pulse electro-deposition, a method that offers precise control over film properties."
- 2- One reviewer gives comment such as "Chosen ternary material is good."
- 3- One reviewer gives comment such as "Accept after minor revision"
- 4- Two reviewers give comment such as "Accept after major revision".

According to the comments, the authors have corrected the manuscript carefully. Therefore, the manuscript has enough value for publication in the BP International.
