

Review Form 3

Book Name:	Economics and Entrepreneurship
Manuscript Number:	Ms_BPR_3336.15
Title of the Manuscript:	THE EFFECT OF ENTREPRENEURIAL PASSION AND CREATIVITY ON ENTREPRENEURIAL INTENTIONS OF STUDENTS AT A HISTORICALLY BLACK UNIVERSITY
Type of the Article	Book Chapter

PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript is important and relevant considering the significant contribution of entrepreneurship to economic development. The research on students' entrepreneurial intentions is important to enhance entrepreneurial education in tertiary institutions, and youth entrepreneurship. Thus, this manuscript is important as it investigates the determinants of students' entrepreneurial intentions.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the article is suitable and clearly indicates the variables under investigation. The title clearly shows the independent and dependant variables and the aim of the study.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract of the article is comprehensive. The research problem, purpose of the study and methodology are clearly articulated. Even though the main findings are provided, I suggest the author elaborate on the findings since they mention T-tests, ANOVA and multiple regression analysis. Furthermore, the author can elaborate on the recommendations provided, maybe mention 1 or 2 major recommendations.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically correct.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :-	The references are recent. The author included 2023 and 2024 references which are quite recent. However, consider updating the statistics for SA unemployment rate as 2021 is too outdated. Maybe 2023 or 2024 statistics if available. In addition, look at the Global Entrepreneurship Monitor (GEM) South Africa: 2022/2023 Report by Bowmaker-Falconer et al. (2023) for the latest SA Entrepreneurship intention and Entrepreneurial activity indices. These statistics would reinforce your research problem. For the discussion on entrepreneurial intention, you may also consider Linan and Chen (2009) model.	
Is the language/English quality of the article suitable for scholarly communications?	Yes, the language is appropriate.	
Optional/General comments	You may consider adding hypotheses that correspond with the T-tests and ANOVA analysis. From the 3 hypotheses developed for this study, I do not see the relevancy of these tests. All the 3 hypotheses sought to investigate the association between variables.
