Book Name:	Achievements and Challenges of Medicine and Medical Science
Manuscript Number:	**Ms_BPR_ 3690**
Title of the Manuscript:	**Discovery and Validation of a Novel Biomarker for Cancer**
Type of the Article	**BOOK CHAPTER**

PART 1: Review Comments

Compulsory REVISION comments	**Reviewer's comment**	**Author's Feedback** *(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	**The manuscript helps in harnessing early diagnosis of prostate cancer before it proliferates and migrates to other tissues(cancer is treatable when screening is done early and targeting large populations)** **LIKES:1.The zeal to identify other predictors of prostate cancer other than PSA which is nonspecific since can test positive for BPH, prostatitis and exercise** **2.The study provides an alternative to other dianostic procedures** **3.The study can supplement other produres and give alternative confirmatory diagnosis to histopathology which is invasive**	
Is the title of the article suitable? **(If not please suggest an alternative title)**	**YES but need to add prostate cancer not just cancer**	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	**The abstract should have the study design,methods,results,data presentation and analysis**	
Are subsections and structure of the manuscript appropriate?	**No.not necessary**	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	**The manuscript is elaborate on the importance of early diagnosis of prostate cancer which is a crucial element in treatment and management of pca patients.** ZFPL1 gene expression in prostate cancer cells **is an important predictor of cancer of the prostate.** **The methodology procedures are precise and reproduciable to ensure quality of the results**	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. **-**	**YES, References in text, et al should be in italics eg.** *et al*	
Minor REVISION comments **Is the language/English quality of the article suitable for scholarly communications?**	yes	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
