

[Review Form2](#)

Book Name:	Disease and Health: Research Developments
Manuscript Number:	Ms_BPR_3755
Title of the Manuscript:	The Origin of Viruses and Somatic Diseases
Type of the Article	Book chapter

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. Why do you like (or dislike) this manuscript? A minimum of 3-4 sentences may be required for this part.	The research presented in this chapter is very interesting and touches on topics of great medical interest, starting from the adaptation of microorganisms to mammalian organisms, to the modification of the conception of vaccines, which are directed towards the use of adaptogens developed by microorganisms. Indeed, the SARSCoV2 pandemic has raised a number of questions about its epidemiology, how it has affected different age groups, and whether vaccines are effective or not. This is why I find the approach presented in this chapter interesting and important.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is well structured	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write a few sentences regarding the scientific correctness of this manuscript. Why do you think that this manuscript is scientifically robust and technically sound? A minimum of 3-4 sentences may be required for this part.	From a scientific point of view, as I said in my first comment, it covers a broad topic of infectious diseases. Concerning the evolution of mammals, including humans, I think the author was referring to their adaptation to the new restructuring of microorganisms. the subject generates many questions and much can be discussed, but I think that the information presented answers some questions.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	The bibliography is suggestive, with many recent issues. could the author look for some bibliographical sources from the last 5 years (for example)? I think it is a topical subject so I think it would not be difficult to find these sources. If not, probably starting with this chapter, bibliographic sources will be improved.	

Review Form2

Minor REVISION comments		
Is the language/English quality of the article suitable for scholarly communications?	yes	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
