Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The article is a brilliant exposition of auroras in general. It would be very useful if included in school syllabi as students need to be informed of such marvellous wonders of our universe.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable as the focus is on Motke capturing the marvels in oil paint. This should be an important piece of information to artists.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The length is appropriate and not boring or lengthy. I don’t think more technical details about the formation of auroras need to be added.
