**PART 1: Comments**

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	For me this study may be important, keeping in view the current educational trends. It has highlighted the important aspects of burnout, specifically related to college students. The researcher has also tried to differentiate between college burnout and job-related burnout. The study also proposes certain prospects to carry this concept further.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	Suitable, an alternate option could be: Unveiling Learning Burnout Among College Students: A Research Perspective	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	The abstract is very short. I think it doesn't clearly outline the whole research study. It needs to be revised and need to show the overall study's processes, findings and implications- too.	
<b>Is the manuscript scientifically, correct? Please write here.</b>	Certain areas need to be focussed, i.e. no research methodology is mentioned to justify the claims of analysis (how analysis of the literature is being carried out). The sections need to focus on chronological arrangements of research protocols. Further, the conclusion part is missing too, it is an important heading to encompass the overall findings and adding to future implications.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	Sufficient, if latest literature is being added, it will further strengthen the quality of paper.	
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	Yes, appropriate.	
<b>Optional/General</b> comments	Overall, the study is an improved attempt. Certain areas, mentioned above needs to be given prime focus to enrich the content and quality of this analytical paper.
