Book Name:	Achievements and Challenges of Medicine and Medical Science
Manuscript Number:	Ms_BPR_3957
Title of the Manuscript:	Effect of Addition of Medicinal Cannabis Treatment to Conventional Treatment in Diabetic Neuropathy Patients
Type of the Article	Book chapter

PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Cannabis may be an effective alternative or adjunctive treatment for peripheral neuropathy, an often debilitating condition for which standard treatments often provide little relief. Most studies show moderately improved pain from inhaled cannabis use, but adverse effects such as impaired cognition and respiratory problems are common, especially at high doses. Data on the long-term safety of cannabis treatments are limited. Until risk/benefit profiles are better characterized, doctors in states where cannabis therapy is legal should recommend it for peripheral neuropathy only after careful consideration.	
Is the title of the article suitable? (If not please suggest an alternative title)	Suggested: Effect of Addition of Medicinal Cannabis to Conventional Treatment in Diabetic Neuropathy Patients	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Fair	
Is the manuscript scientifically correct? Please write here.	Please maintain space in between words all through the article. please clarify its medicolegal issue of usage or its approval by any drug safety regulatory bodies of different societies or countries	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. :	I think more recent references should be included. If there any guideline or regulatory body recommendation regarding use of medicinal cannabis in diabetic neuropathy then should be included in discussion and introduction section. Please add a clear recommendation regarding use of this agent of drug safety regulatory bodies.	
Is the language/English quality of the article suitable for scholarly communications?	Fair.	
Optional/General comments	Although current research shows an analgesic benefit of cannabis on neuropathic pain comparable to that of gabapentin, further investigation is needed to better evaluate long-term safety, efficacy, and interactions with standard therapies. Until we have a more complete picture, we should use the current literature, along with a thorough knowledge of each patient, to determine if the benefits of cannabis therapy outweigh the risks.
