Book Name:	<a href="#">Achievements and Challenges of Medicine and Medical Science</a>
Manuscript Number:	Ms_BPR_4017
Title of the Manuscript:	Ozone Therapy in the Treatment of Symptoms Associated to Trigeminal Neuralgia
Type of the Article	Book Chapter

**PART 1: Comments**

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Trigeminal neuralgia is a debilitating condition which is generally managed with the use of medications. Long term use of these medications resulting in various side effects and tolerance of these drugs reducing their efficacy. This article sheds light on an alternative treatment modality which can be beneficial for all patients with trigeminal neuralgia particularly the recalcitrant ones.	
Is the title of the article suitable? (If not please suggest an alternative title)	I feel better than writing symptoms associated to trigeminal neuralgia, the author can include "treatment of trigeminal neuralgia"	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is very abrupt. The sentences don't feel free flowing. It would be better to rewrite the abstract.	
Is the manuscript scientifically, correct? Please write here.	Yes	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	References are fine	
Is the language/English quality of the article suitable for scholarly communications?	No	
<b>Optional/General</b> comments	<ol style="list-style-type: none"> <li>1. Why did the authors decide to use ozone therapy in not clearly mentioned.</li> <li>2. Procedure done for the patient should be mentioned in detail.</li> <li>3. I feel the author can include the VAS values obtained in pre treatment, mid treatment and post treatment in the article.</li> <li>4. Authors can do a proper comparison in the discussion with the articles where they have used ozone therapy as treatment for trigeminal neuralgia.</li> <li>5. In conclusion, with just one case report, authors can't say that ozone therapy is useful for trigeminal neuralgia. They can only imply it. Confirming the usefulness will require a large scale study.</li> </ol>
