PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript highlights the significance of addressing complex cases of aortic paravalvular leak (APVL), a rare but severe complication following surgical valve replacement. It underscores the importance of transcatheter paravalvular leak closure (TPVLc) as a minimally invasive and life-saving alternative for patients at high surgical risk. By detailing procedural challenges and innovative solutions, such as the use of dedicated paravalvular leak devices and precise imaging-guided techniques, this case contributes valuable insights to the evolving field of structural heart interventions. The successful management of this challenging case reinforces the critical role of early diagnosis, personalized treatment strategies, and interdisciplinary collaboration in improving patient outcomes and advancing cardiovascular care.
