|                          |   |
|--------------------------|---|
| Book Name:               | <a href="#">Achievements and Challenges of Medicine and Medical Science</a> |
| Manuscript Number:       | Ms_BPR_4101   |
| Title of the Manuscript: | <b>Bilateral sporadic aniridia: review of management</b>                    |
| Type of the Article      | <b>Book chapter</b>   |

**PART 1: Comments**

|   | Reviewer's comment  | Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i> |
|---|---|---|
| <b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b> | This manuscript is interesting as a report because the case quite rare.   |   |
| <b>Is the title of the article suitable? (If not please suggest an alternative title)</b>   | It is better to state that this is a case report that highlights the management aspect of aniridia.   |   |
| <b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>      | Abstract is too short, keywords too much.<br>Abstract at least 100-250 words. Keywords 3-5 words.   |   |
| <b>Is the manuscript scientifically, correct? Please write here.</b>  | Yes   |   |
| <b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b><br>=                         | All the references are over 10 years. The references should preferably be less than 10 years, or even better, less than 5 years.  |   |
| <b>Is the language/English quality of the article suitable for scholarly communications?</b>  | Use more standardized terminology.<br>What writer(s) means about "axial lens opacity", "let alone treatment"?   |   |
| <b>Optional/General</b> comments  | The one and only photo is blurry. The rudimentary iris, large pupillary space, and cataract are not visible. The management section is only one sentences, even though it is highlighted in the title. The article would benefit from a more detailed exploration of the long-term outcomes of the management strategies discussed. |   |
