Book Name:	<a href="#">Science and Technology: Developments and Applications</a>
Manuscript Number:	Ms_BPR_4206
Title of the Manuscript:	Intervention of Electrical Resistance Tomography (ERT) in Resolving Hydrological Problems of a Semi Arid Granite Terrain of Southern India
Type of the Article	BOOK CHAPTER

**PART 1: Comments**

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Importance of this manuscript for the scientific community as it contributes to existing knowledge are as follows: Mapping of subsurface rock properties and structures, Mapping depth to bedrock for Engineering construction, It helps to identify aquifers, their extent and assess their potential for groundwater etc	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is good and suitable for the work but I wish instead of using INTERVENTION in the title, EFFECT can be used.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is not comprehensive enough as it lacks brief result of the analysis. A good abstract must contain BRIEF introduction, methodology, result and conclusion and probably recommendation.	
Is the manuscript scientifically correct? Please write here.	Yes, It is scientifically correct as the author followed due process and principle in data collection and the methodology used is scientifically correct. Also, the (2D) interpretation is accepted by me as I have worked in related capacity and with my experience in this field.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form. =	No, the references are too scanty, the author should read more on the related literature review and populate the reference section. A lot of recent works have been done in this area of study.	
Is the language/English quality of the article suitable for scholarly communications?	Yes	
<u>Optional/General</u> comments	This work is good and I believe with this comments of mine and others, if properly corrected, It will contribute to scientific knowledge
