

BPI Review Form 070520

Book Name:	Advanced Concepts in Pharmaceutical Research
Manuscript Number:	Ms_BP_12271F
Title of the Manuscript:	SYNTHESIS AND MOLECULAR DOCKING STUDIES OF ETHYL 1-BENZENESULFONYL -2-[(E)-2-(2 METHYLPHENYL) ETHENYL] INDOLE -3-CARBOXYLATE WITH HUMAN RENIN COMPLEXED WITH INHIBITOR
Type of the Article	Book Chapter

PART 1: Review Comments

	Reviewer's comment	Author's comment (If agreed with the reviewer, correct the manuscript and highlight that part in the manuscript. Authors must write his/her feedback here)
Is the manuscript important for the scientific community? Please write a few sentences explaining your answer	The manuscript is important for the scientific community. Authors showed that computational molecular docking studies of (Ethyl 1-benzenesulfonyl-2-[(E)-2-(2methylphenyl)ethenyl] indole-3- carboxylate(code: CR1) with Human Renin complexed with inhibitor (PDB ID: 2IKO) using Molegro Virtual Docker software done to understand the basic mechanism of inhibition. It is very important study for hypertensive therapy.	
Is the title of the article suitable? Do you have any alternative Title in your mind?	The title is suitable.	
Is the abstract of the article comprehensive? If your answer is No, please provide suggestions	The abstract of the article is comprehensive.	
Do you think the English quality of the article is suitable for scholarly communications? If your answer is No, please provide suggestions	The English quality of the article is suitable.	
Please provide your comments regarding the appropriateness of different sections of the manuscript.	Authors showed that docking studies on the human renin complexed with inhibitor and it shows their role in the antihypertensive activity of the molecule.	
Do you think that the references in the manuscript are proper, recent and sufficient? If you have any suggestions, please write here.	The references in the manuscript are proper.
